

Client Fund Security

** Introduction**

At Swisdex, the security of client accounts, personal information, and cryptocurrency transactions is a top priority. We implement security procedures, verification measures, and compliance controls designed to help protect clients against unauthorized access, fraud, and financial crime.

This page outlines the security practices adopted by Swisdex. Unless specifically stated in official regulatory documentation, this policy should not be interpreted as a guarantee of segregated client funds, deposit insurance, or government-backed protection.

Account Security

Clients play an important role in maintaining account security. Swisdex recommends the following best practices:

- * Use strong and unique passwords for your Client Portal and trading accounts.
- * Enable Two-Factor Authentication (2FA) whenever available.
- * Never share passwords, login credentials, verification codes, or OTPs with any third party.
- * Regularly update account passwords.
- * Log out after each session, especially when using public or shared devices.
- * Monitor account activity and report any suspicious activity immediately.

Swisdex will never ask for your password via email, telephone, social media, or chat applications.

Identity Verification (KYC)

To comply with Anti-Money Laundering (AML) and Know Your Customer (KYC) requirements, Swisdex may request identity verification before allowing certain account activities.

Verification may include:

- * Government-issued Photo Identification
- * Proof of Address

- * Selfie Verification
- * Source of Funds Documentation
- * Additional compliance documentation when required

Failure to complete verification procedures may result in restrictions on deposits, withdrawals, or account functionality.

Anti-Money Laundering (AML) Protection

Swisdex maintains internal AML controls designed to detect and prevent:

- * Money laundering activities
- * Fraudulent transactions
- * Identity theft
- * Terrorist financing
- * Unauthorized account usage

The Company reserves the right to review, delay, reject, or investigate any transaction that may violate applicable laws, regulations, or internal compliance procedures.

Cryptocurrency Transaction Security

As a crypto-funded trading platform, Swisdex supports cryptocurrency deposits and withdrawals through approved blockchain networks.

To protect client funds:

- * Deposit addresses are generated through the official Client Portal.
- * Blockchain confirmations are required before deposits are credited.
- * Withdrawal requests may undergo additional verification checks.
- * Internal monitoring systems may review unusual transaction activity.

Clients should always verify:

- * Wallet addresses
- * Cryptocurrency type
- * Blockchain network selection

Cryptocurrency transactions are irreversible once confirmed on the blockchain.

Swisdex cannot recover funds sent to incorrect wallet addresses or unsupported blockchain networks.

Payment Method Ownership

For security and compliance reasons:

- * Deposits and withdrawals must originate from and be sent to wallets controlled by the registered account holder.
- * Third-party deposits and withdrawals are strictly prohibited.
- * Additional ownership verification may be required before withdrawals are approved.

Transactions involving third parties may be delayed, rejected, or investigated.

Withdrawal Verification

Before processing withdrawals, Swisdex may conduct security checks including:

- * Identity verification
- * KYC status review
- * Wallet ownership confirmation
- * Account security assessment
- * Compliance and AML review

These procedures help protect clients from unauthorized withdrawals and fraudulent activity.

What Clients Should Verify Before Depositing

Before making any cryptocurrency deposit, clients should:

- * Confirm they are accessing the official Swisdex website.
- * Verify the wallet address generated within the Client Portal.
- * Ensure the correct blockchain network is selected.
- * Review all legal documents and risk disclosures.
- * Complete account verification requirements.
- * Contact official support if there is any uncertainty regarding payment instructions.

Clients should never transfer funds to wallet addresses received through unofficial channels.

Website and Portal Security

Cybercriminals may create fraudulent websites, emails, or social media accounts that imitate legitimate financial services.

Before logging in or making a payment, clients should:

- * Confirm they are visiting the official Swisdex website.
- * Verify the URL carefully.
- * Avoid clicking suspicious links from unknown sources.
- * Access their account only through official Swisdex platforms.
- * Report suspected phishing attempts immediately.

Swisdex is not responsible for losses resulting from the use of fraudulent third-party websites or services.

Data Protection and Privacy

Swisdex takes reasonable measures to protect client information against unauthorized access, misuse, disclosure, or loss.

Personal information collected during registration and verification is used only for:

- * Account administration
- * Compliance obligations
- * Transaction processing
- * Security monitoring
- * Customer support

Client information is handled in accordance with applicable privacy and data protection requirements.

Important Notice

This Client Fund Security Policy describes security, verification, and compliance procedures implemented by Swisdex.

Nothing within this policy should be interpreted as:

- * A guarantee against trading losses
- * Deposit insurance
- * Government-backed protection
- * Segregated client fund arrangements unless separately disclosed in official documentation

Clients remain responsible for understanding the risks associated with online trading and cryptocurrency transactions.

Reporting Security Concerns

If you suspect:

- * Unauthorized account access
- * Fraudulent activity
- * Phishing attempts
- * Identity theft
- * Suspicious cryptocurrency transactions

Please contact the Swisdex Support Team immediately:

****Email:**** [support@swisdex.com]

Prompt reporting helps us investigate and protect your account more effectively.

Risk Warning

Trading Forex, CFDs, Commodities, Cryptocurrencies, and other leveraged financial instruments involves significant risk and may not be suitable for all investors.

Clients should carefully assess their financial circumstances and understand the risks involved before trading. Past performance does not guarantee future results.
